WATER CLEAR

ORGANIC AQUATIC WEED CONTROL

-  National Registration Authority (NRA) Approval No. 47864/0897
-  Readily biodegradable to AS 4351.2/ISO 7827
-  Pleasant citrus fragrance

Polo Water Clear is an effective solution for the control of Salvinia Molesta, Red Azolla and Lemna in water bodies. *Water Clear* is specially formulated using orange oil and organic surfactants to ensure maximum effectiveness and minimal environmental impact.

Water Clear provides a final surface clean by removing unsightly weeds, plant debris, dust and other solid particles in a number of situations, and provides a shiny, reflective mirror-like surface on the water body.

Application

Polo Water Clear is designed for use in artificial impoundments and enclosed bodies of water (NSW and Qld only), under the supervision of Polo Citrus Australia.

The application rate is just one part *Water Clear* to 100 parts water. Spray lightly onto free-floating plants. Avoid a single heavy application. Instead apply several light applications over a 1-3 week period. Apply when infestation is small rather than advanced.

Do not overspray more than 0.5 m into open water. If weed growth is heavy, mechanical removal prior to spraying may be used to minimise the amount of spraying necessary and reduce the risk of eutrophication. Water bodies with an average depth of less than one metre should not be treated.

Apply with spray equipment such as a backpack sprayer or hand-held pressurised sprayer.

Polo Water Clear is not for use in natural water bodies, or in streams where it will reach natural water bodies. Do not use in dams holding water for humans.

Polo Water Clear is recommended for

-  Golf courses
-  Town parks
-  Holiday resorts
-  Tourist parks
-  Garden ponds
